

Summer Math Challenge

A Message to Cromwell's Parents and Students entering grades 1-12:

Success in math leads to ***infinite possibilities***. You have worked so hard this year to strengthen your math skills. Keep them sharp by practicing throughout the summer. Please see information below about our Connecticut Education Commissioner's Summer Math Challenge.

Why? Because being mathematically literate is important. Mathematically literate individuals are able to make informed decisions about the world around them and have the interest and confidence to meet the needs and challenges of today's society.

What? Click on the [SUMMER MATH FLIER](#) to access information for how to participate at your grade level.

If you choose to participate, please bring the [Summer Math Log](#) or completed [Summer Passport](#) back to your school's math/classroom teacher on or before **September 8th** to be recognized for your participation. Students that complete these challenges will be acknowledged in the fall through a variety of building-based raffles, celebrations and/or extra credit opportunities within your math class.
